How to set up.
This keyboard is compatible to the Apple iOS software for use with an iPad and iPhone, or to the Mac OS X software when used with Mac models. Follow the setup instructions below to connect your new keyboard, with attention to which type of device it is meant for use with.

For use with iPad® and iPhone® (Apple iOS®)

1) Install batteries in the keyboard, making sure that they are positioned according to the embedded directions in the battery cavity.

2) Turn the Power switch on the back of the keyboard to the "On" position.

3) Press and hold the "Connect" button on the back of the keyboard for 3 seconds until the LED indicator on the front of the keyboard flashes.

4) On your iPad / iPhone, go to Settings > Bluetooth and select "Bluetooth Logickeyboard" on your list of Bluetooth Devices, to start the pairing process.

5) A dialogue window appears on the iPad / iPhone with a four-digit code.

6) Type the four-digit code on your "Bluetooth Logickeyboard" followed by Return/Enter.

7) Your keyboard should now be listed as "Connected" on the Bluetooth Devices list on your iPad / iPhone.

8) In order to make your new Logickeyboard fully compatible to the iPad / iPhone iOS, type the key combination of Fn + Ctrl + W on your "Bluetooth Logickeyboard".

9) Your keyboard is now ready for use.

For use with Mac® (Mac OS® X)

1) Install batteries in the keyboard, making sure that they are positioned according to the embedded directions in the battery cavity.

2) Turn the Power switch on the back of the keyboard to the "On" position.

3) Press and hold the "Connect" button on the back of the keyboard for 3 seconds until the LED indicator on the front of the keyboard flashes.

4) Open Bluetooth on your Mac OS and find "Bluetooth Logickeyboard" on your list of Bluetooth Devices, and click the "Pair" button to start the pairing process.

5) A dialogue window appears giving you a six digit pairing code.

6) Type the six-digit code on your "Bluetooth Logickeyboard" followed by Return/Enter.

7) Your keyboard should now be listed as "Connected" on the Bluetooth Devices list in your Mac OS.

8) In order to make your new Logickeyboard fully compatible to the Mac OS, type the key combination of Fn + Ctrl + Q on your "Bluetooth Logickeyboard".

9) Your keyboard is now ready for use.

Troubleshooting

I don't see "Bluetooth Logickeyboard" on my Bluetooth Device list.

- Make sure Bluetooth is enabled on your device.

- Replace the batteries if they are power drained.

- Turn power button on the back of the keyboard to the position "On"

- Ensure that the keyboard is within a 30 feet ~ 10 meters distance from your device.

After being kept idle for some time, my keyboard looses keystrokes.

- The keyboard goes to power saving mode after being idle for 15 minutes. After pressing any key there is a wake-up time of 4 seconds.
